

## Dell Studio 1558 Touch

Tuesday, 02 March 2010

Good news! It seems that Dell has included the Studio 1558 Touch on their web catalog recently. Generally, this particular laptop comes with multi-touch functionalities, whereby you can easily point on your screen to provide commands to the respective laptop.

On the other hand, the Studio 1558 Touch also comes with the latest Core i5 processor, and it also runs on the Windows 7 Home Premium operating system. There's 320GB of hard disk storage space as well.

Well if you are waiting anxiously for a Core i5 laptop, perhaps it's time that you should take a closer look at Dell's latest release, namely the Studio 1558 Touch.
